Python, Java,
C,Data Structures
and Algorithms,
Problem Solving

📁 Experience

VERNA E-commerce Website

A dynamic E-Commerce website was developed to provide an enhanced online shopping experience. User authentication, order tracking, and payment integration are supported by Verna, ensuring that a smooth end-to-end transaction flow is maintained.

A vendor dashboard and admin panel for product management are also included, making the platform complete for both customers and sellers.

POSTPRO

A lightweight and powerful blog system was created using HTML, CSS, JavaScript, PHP, and a JSON-based database.

Secure registration and login features were integrated through a user authentication system. Features like post categorization, recent post display, and basic admin controls are also supported by the system, resulting in a complete blogging experience within a simple, easy-to-use interface.

HydroTracker

A website was built to calculate and track the water used in producing everyday products. A clean and responsive interface was designed using HTML, CSS, JavaScript, and Artificial Intelligence to display water footprints for selected items.

Certificates

Responsive Web Design

Data Programming using SQL and Python

AWS

Languages

English
